

star without mercy

there is a star without mercy
seems so far away it can't keep from falling
good mother earth we will burn.
we're coming oh yes we're coming
we're so naked and so helpless
and your fire will transform us
we see you flicker star without mercy.

out in the dark the universe
all is quiet all is waiting
our fate never to be changed.
we're coming oh yes we're coming
we're so naked and so helpless
and your fire will transform us
we see you flicker star without mercy.

you take the dead you take the living
poor and rich you don't choose
summer or winter you take as we come.
we're coming oh yes we're coming
we're so naked and so helpless
and your fire will transform us
we see you flicker star without mercy.
